

ifs e-test™

Electronic assessment delivery system

The **ifs** School of Finance is a pioneer of electronic testing, having successfully delivered over 250,000 electronic tests over the last four years. We are currently expanding our service to offer greater flexibility to our corporate customers through our innovative new electronic assessment delivery system **ifs e-test™**.

ifs e-test™

ifs e-test™ is the electronic assessment system for objectively tested examinations, developed by the **ifs** School of Finance. It is designed to combine ease of use and the highest levels of security, with minimal demand on system resources. It allows users to take examinations within a controlled environment on their own premises at times convenient for them.

As a supplement to the existing network of 150 test centres across the UK, **ifs e-test™** offers corporate customers potential cost savings and enhances speed to market over other forms of assessment.

How ifs e-test™ works

The **ifs e-test™** software comprises two elements: an administration suite and the assessment software.

The administration suite allows the administrator to set up examinations, choosing the specific examination that candidates will sit and setting the start date. The system provides flexibility around examination scheduling to best meet our customers training needs, and this administrative process can be handled from anywhere in your network.

Once the assessment software is loaded on individual workstations/PCs, examinations can be downloaded for any number of candidates, subject to spacing requirements. Candidates in one examination venue do not need to be taking the same qualification or subject.

At the end of the session the system calculates the marks and the results are immediately available to be printed as soon as the examination is complete. The results should then be uploaded to the **ifs** via a secure link, at which point they are available online through **my ifslearning**.

Benefits

- The examinations can be delivered at any secure location within an organisation.
- Flexible examination times – organisations can arrange a date and time convenient for their candidates.
- Speed of results – the system enables candidates to receive their results, with feedback, at the end of the examination.
- Bespoke, company-specific assessment services, delivered through **ifs e-test™**.
- Security – the software has been designed to ‘lock down’ any other applications, preventing any service interruption.
- Lightweight – **ifs e-test™** will run on low specification servers.
- Ease of use – **ifs e-test™** allows candidates to choose between using a mouse or keyboard to navigate through the examination.

Getting started

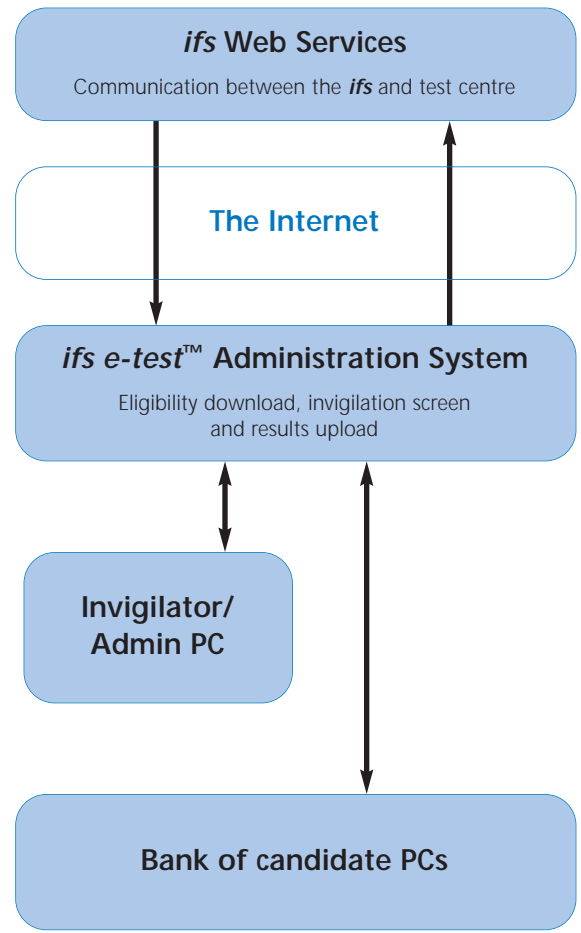

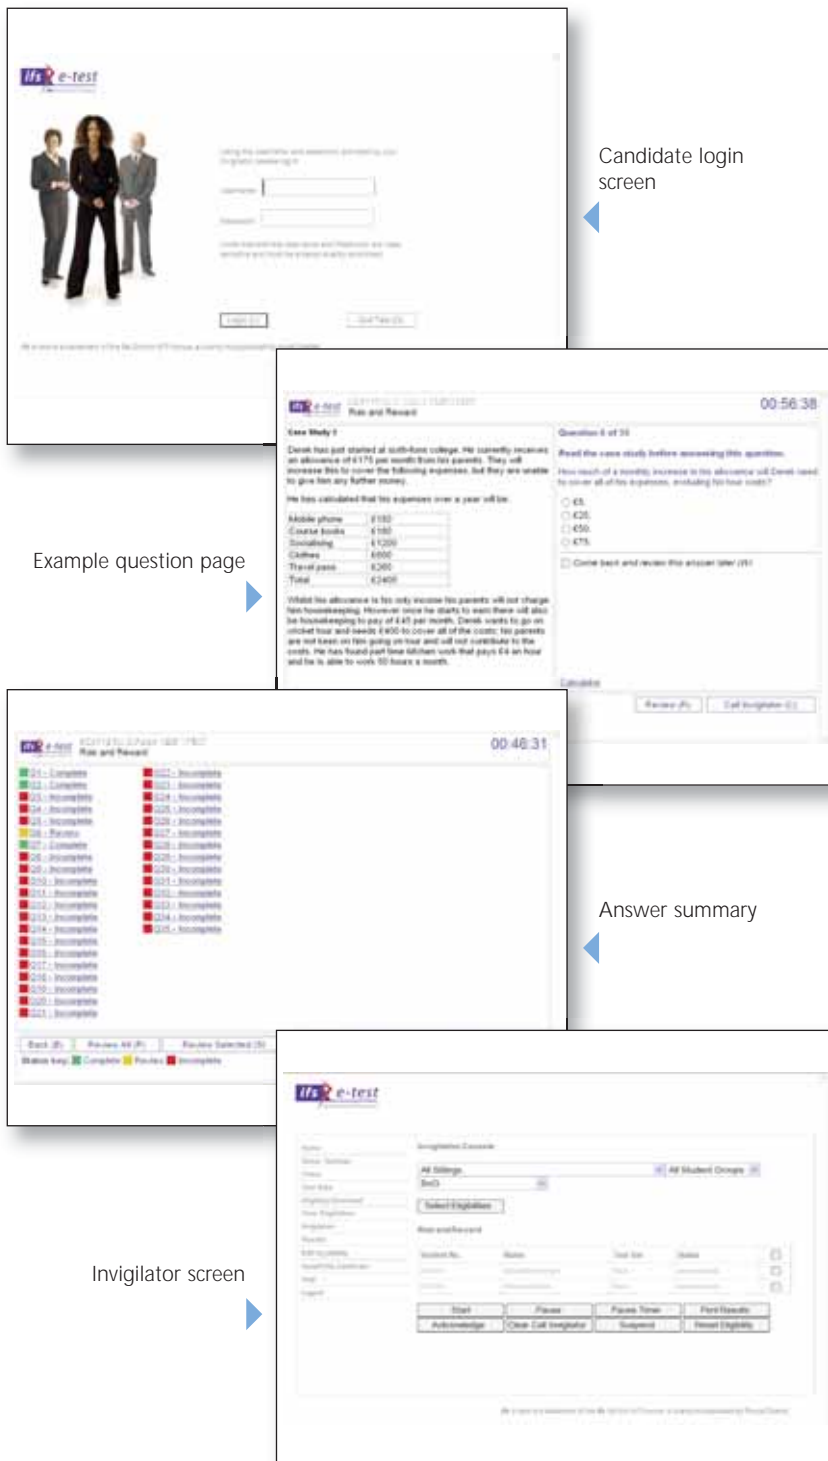

Please visit www.ifslearning.ac.uk/e-test to view the demo and find out more.

Alternatively please contact your Customer Relationship Manager or the **ifs e-test™** team.
